Vedic Maths

Discover The MatheMagician in You !!!

Vedic Maths is called "Magical Maths." As it solves difficult problems very speedily. It is very helpful for student appearing for any kind of Maths Exam. It helps to solve mathematical calculations in few seconds. The simplicity of Vedic Mathematics means that calculations can be carried out mentally (though the methods can also be written down). There are many advantages in using a flexible, mental system. Pupils can invent their own methods, they are not limited to the one 'correct' method. This leads to more creative, interested and intelligent pupils.

In the Vedic system 'difficult' problems or huge sums can often be solved immediately by the Vedic method. These striking and beautiful methods are just a part of a complete system of mathematics which is far more systematic than the modern 'system'.

At Laqshya Institute of Skills Training we have divided Vedic Maths, in three levels. Level 1 + Level 2 is recommended for school kids from Std. V to Std.X. Whereas For college students and for those appearing for any kind of competitive exams viz Banking Exams, CET, CMAT, GRE, GMAT and various other entrance exams etc, Level 3 is compulsory recommended along with Level 1 + Level 2.

Level 1 is basic. It includes mental addition, subtractions and various multiplications like power of 9 , power of 5 , base method, triangular method, table formation etc.

Level 2 is advance of arithmetic. It covers advanced level multiplications learnt in level 1. Besides this additional topics are prime numbers, divisibility, squares, cubes, square roots, cube roots, division by nikhilam method etc.

Level 3 is pure algebra. It helps to solve simple algebraic equations, simultaneous equations, quadratic equations, factorization of quadratic equations etc. in a very simple & interesting manner.
